

The Proven Path to Protection

Advanced Preservative System

Preserve® ACQ pressure treated wood
Long-term protection for your exterior projects.

- ▶ Ideal for residential, commercial and certain agricultural projects
- ▶ Ground contact general use, fresh-water immersion, and salt-water splash applications
- ▶ Easy-to-paint or stain
- ▶ Lifetime Limited Warranty* against fungal decay and termite attack * See Lifetime Limited Warranty for terms and conditions at Treatedwood.com

Proven Product Performance

- ▶ Proven protection for wood products in Canada since 2002.
- ▶ Preserve® pressure treated wood products are produced to the Canadian Standards Association (CSA) standards as specified in the National Building Code of Canada for residential and commercial applications.
- ▶ Utilizes the world's most widely used form of copper preservative.
- ▶ Certified Green Product for Resource Efficiency

Residential Use & Homeowner Projects

- ▶ Decks, Porches, Arbors, Gazebos, Fences, Walkways & Retaining Walls
- ▶ Raised Beds, Planter Boxes, Outdoor Furniture, Picnic Tables & Play Sets

Commercial Project Use

- ▶ Sill Plates, Furring Strips, Shakes & Shingles
- ▶ Pilings, Piers, Boardwalks, Bridges & Permanent Wood Foundations
- ▶ Structural Columns, Sign Posts, Utility Poles, Building Poles & Guardrails

Agricultural Use

- ▶ Tomato & Grapevine stakes and Livestock Fencing
- ▶ Post Frame Structures, Pole Barns, Stables & Corrals

Service Conditions Use Environment	CSA Use Category	Typical Products
INTERIOR, ABOVE GROUND, DRY Protected from weather	UC1	Interior framing
INTERIOR, ABOVE GROUND, DAMP Protected but can be exposed to moisture	UC2	Sill plates
EXTERIOR, ABOVE GROUND, COATED Protected by coating. Free draining	UC3.1	Coated millwork, siding, trim
EXTERIOR, ABOVE GROUND, UNCOATED Exposed to all weather cycles	UC3.2	Decking, railings, picket fencing, footbridge boards & bridge railing
EXTERIOR, GROUND CONTACT Exposed to all weather cycles	UC4.1	Ground Contact and Freshwater Contact*. Timbers, deck and fence posts, structural lumber, guardrails, and Bridge decks
EXTERIOR, GROUND CONTACT CRITICAL USES Exposed to all weather. High decay potential	UC4.2	Building poles, Utility poles, Guardrail, sign posts and Piles*
COASTAL WATERS INCLUDING BRACKISH WATER Continuous salt water exposure	UC5A	Piles*, bulk-heads* and bracing*
NOT ENCOUNTERED IN CANADIAN WATERS	UC5B+C	

Nails, Fasteners and Connectors

For the best results, the use of building-code approved, corrosion-resistant fasteners and connectors is always recommended for all exterior wood projects. Direct contact of Preserve treated wood with aluminum products is not recommended.

Hot-dipped galvanized fasteners (meeting ASTM A 153) and connectors (ASTM A 653 Class G185 sheet), or better, are recommended.

For Permanent Wood Foundations and corrosive environments, such as areas with saltwater spray, stainless steel fasteners are recommended.

Painting and Staining

Can be painted or stained to match any outdoor color scheme. High-quality oil and latex based paints, stains or water repellent coatings with UV protection are recommended to enhance the long-term beauty and weathering performance. It is important that the wood is dry and clean prior to applying any finish coating. Left uncoated and without UV protection, treated wood will initially weather to a natural brown color, eventually turning gray following long-term exposure to the sun. Always follow the manufacturer's recommendations for proper application of finishes.

Specifications and ovals

Preserve® Pressure-Treated Lumber and Plywood

Accepted and Standardized Preservative of The Canadian Standards Association (CSA) as specified in the National Building Code of Canada.

▶ CSA Use Categories

- Above Ground Use: UC1, UC2, UC3.2**
- Ground Contact Use: UC4.1*, UC4.2***

For Permanent Wood Foundations and corrosive environments, such as areas with saltwater spray, stainless steel fasteners are recommended.

Safe Practices When Working With Pressure-Treated Wood

- ▶ Wear gloves when working with wood.
- ▶ Wear a dust mask when machining any wood to reduce the inhalation of wood dusts.
- ▶ Wear appropriate eye protection to reduce the potential for eye injury from wood particles and flying debris during machining.
- ▶ Wash hands thoroughly with mild soap and water after working with treated wood.
- ▶ All sawdust and debris should be cleaned up and disposed of after construction in accordance with local waste management regulations.
- ▶ Do not burn pressure-treated wood.
- ▶ Wash work clothes separately from other household clothing before reuse.
- ▶ Pressure-treated wood should not be used where it may come into direct or indirect contact with drinking water, except for uses involving incidental contact such as fresh water docks and bridges.
- ▶ Do not use pressure-treated wood in circumstances where the preservative may become a component of food, animal feed or beehives.
- ▶ Do not use pressure-treated wood for mulch.
- ▶ Treated wood may be disposed of in landfills or burned in commercial or industrial incinerators or boilers in accordance with federal, state and local regulations.

* Applies to ACQ 2102

Preserve® ACQ is a NAHB Home Innovation Research Labs Green Certified Product for Resource Efficiency and is eligible to contribute points toward a building certification under the National Green Building Standard™. See our Preserve ACQ product listing on www.GreenApprovedProducts.com for more information.

Preserve® treated wood products are produced by independently owned and operated pressure treating wood facilities. * See Preserve ACQ Lifetime Limited Warranty at Treatedwood.com.
