**BEFORE**

**AFTER**

Whether you are replacing a worn out gate or installing a new gate, it will be a job made easy with our Adjust-A-Gate™ “all steel” gate kit system.

Adjusts to fit all gate openings with our unique steel sleeve construction. The Adjust-A-Gate™ kit includes: new hinges, lockable latch, assembly screws, adjustable truss cable system, and all steel gate frame.

The Adjust-A-Gate™ system comes with all the components needed to build a sturdy, reliable, lifetime gate.

UL-301 Drop Rod Kit

# ADJUST-A-GATE™ FINALLY A GATE THAT WORKS

This “adjustable” gate system comes in a variety of designs to fit ALL CONTRACTOR and HOME OWNER requirements. The ADJUST-A-GATE™ features an all steel galvanized 1 1/2” square frame and fittings with a UV protected powder coat finish. All gates come with our exclusive adjustable diagonal truss wire and will provide you with a lifetime of service. Your gate will never sag or drag again!

Size Shown: AG36

The AG36-3 and AG60-3 *Contractors Choice Series* is a labor saving design using 3 horizontal rails and shares all the same adjustable qualities as the Adjust-A-Gate™ *Original Series*. As a contractor you will always have the right gate for the job (no more wasted trips and man hours). This 60” high steel frame provides support for the wood fence boards top, bottom and center. The *Contractors Choice Series* is perfect for 5’ and taller fences.

Size Shown: AG36-3

Size Shown: AG36-36

The *Original Series* is adjustable from a 36”-60”(AG36) and 60”-96”(AG60) single gate opening. For wider opening such as driveways use two Adjust-A-Gate™ kits and the UL-301 Drop Rod Kit to create a double drive gate opening as wide as 16 feet! This Series is perfect for 4’, 5’ and 6’ high wood fences.

Size Shown: (2) AG36 with UL-301 Drop Rod Kit

The AG36-36 and AG60-36 is a new addition to our *Original Series* and is used for picket style fences and other wood fences where the overall height of the fence is 4’ or less.
